- (ii) Suggest how changes in technology have contributed to an increase in commuters living in rural areas like the Peak District National Park, in recent years. [2]

Changes in technology have contributed to an increase in commuters living in rural areas because technology has developed meaning that people can travel with ease, giving them access to major cities with better paid jobs because they're more skilled.

- (ii) Suggest how changes in technology have contributed to an increase in commuters living in rural areas like the Peak District National Park, in recent years. [2]

Changes in technology have contributed to an increase in commuters living in rural areas because  technology has developed meaning that people can travel with ease, giving them access to major cities with better paid jobs because they're more skilled.

- (ii) Suggest how changes in technology have contributed to an increase in commuters living in rural areas like the Peak District National Park, in recent years. [2]

Faster cars would have enabled people to make use of the M6, M1 and M62 motorways that surround the area. Internet or mobile phones also allow people to work during journeys.

- (ii) Suggest how changes in technology have contributed to an increase in commuters living in rural areas like the Peak District National Park, in recent years. [2]

Faster cars would have enabled people to make use of the M6, M1 and M62 motorways that surround the area. Internet or mobile phones also allow people to work during journeys.

- (iii) Suggest **two** reasons why the Peak District National Park is a popular tourist area. Support your answer with evidence from the OS map and photograph. [4]

- (ii) Changes in employment structure in the Peak District National Park are similar to those across the UK as a whole.

Explain why employment structure in the UK is changing.

[4]

As we are becoming a richer country, we are starting to use machines to replace workers in primary and secondary sectors. ~~The number of~~ <sup>More and more</sup> people are working in tertiary jobs and a growing number of the population in research and quaternary jobs such as IT technicians or consultants.

- (ii) Changes in employment structure in the Peak District National Park are similar to those across the UK as a whole.

Explain why employment structure in the UK is changing.

[4]

The employment structure changes because a country becomes more developed. Over the last 50 years, it has changed from primary to secondary to tertiary. Soon it will change to quaternary. This will be due to economic and developmental changes.

- (ii) Changes in employment structure in the Peak District National Park are similar to those across the UK as a whole.

Explain why employment structure in the UK is changing.

[4]

The employment structure changes because a country becomes more developed. Over the last 50 years, it has changed from primary to secondary to tertiary. Soon it will change to quaternary. This will be due to economic and developmental changes.

- (ii) Describe the possible **negative** effects of the change in house prices in the Peak District National Park on local people. [4]

- (ii) Describe the possible **negative** effects of the change in house prices in the Peak District National Park on local people. [4]

As the Peak District is a national park, it is likely to be a popular place for second homes. This causes prices to rise, however it means many local people cannot buy a home and have to move to cheaper areas. Also, as people may be using their homes as holiday homes, the local economy will suffer as people are not buying local produce all year round.

- (ii) Describe the possible **negative** effects of the change in house prices in the Peak District National Park on local people. [4]

This causes prices to rise, however it means many local people cannot buy a home and have to move to cheaper areas. Also, as people may be using their homes as holiday homes, the local economy will suffer as people are not buying local produce all year round.

- (ii) Describe the possible **negative** effects of the change in house prices in the Peak District National Park on local people. [4]

The more \$ expensive the house, the ~~less~~ less amount of people will be able to afford it.

It does however, mean that richer people may buy them and that may either increase the local economy or if they use them as holiday homes, it will keep local population down.

- (ii) Describe the possible **negative** effects of the change in house prices in the Peak District National Park on local people. [4]

It does however, mean that richer people may buy them and that may either increase the local economy or if they use them as holiday homes, it will keep local population down.

- (iii) Around half of the adults who live in the Peak District National Park travel to work outside of the National Park.

Describe the possible **benefits** that commuters could bring to village life in the National Park. [4]

The possible benefits that commuters could bring to village life in the National Park is that the village would be much quieter during the day when visitors would be there, it also means that because people travel to cities to work they will have a higher income because the jobs are more skilled, therefore quality of life would be higher because they have enough money.

- (iii) Around half of the adults who live in the Peak District National Park travel to work outside of the National Park.

Describe the possible **benefits** that commuters could bring to village life in the National Park. [4]

The possible benefits that commuters could bring to village life in the National Park is that the village would be much quieter during the day when visitors would be there, it also means that because people travel to cities to work they will have a higher income because the jobs are more skilled, therefore quality of life would be higher because they have enough money.

- (iii) Around half of the adults who live in the Peak District National Park travel to work outside of the National Park.

Describe the possible **benefits** that commuters could bring to village life in the National Park. [4]

If people commute to work outside the National park, it means that they will be able to bring extra income into the villages. They won't have to rely on tourism. This will then set in a PNE as more money is spent so more taxes to improve life in the area.

- (iii) Around half of the adults who live in the Peak District National Park travel to work outside of the National Park.

Describe the possible **benefits** that commuters could bring to village life in the National Park. [4]

If people commute to work outside the National park, it means that they will be able to bring extra income into the villages. They won't have to rely on tourism. This will then set in a PME as more money is spent so more taxes to improve life in the area.
