# iPadagogy Wheel

Originally discovered on the website of Paul Hopkin's education consultancy site [mmiweb.org.uk](http://mmiweb.org.uk) adopted by Allan Carrington at the University of Adelaide and further modified for teachers at Zeeland Public Schools.

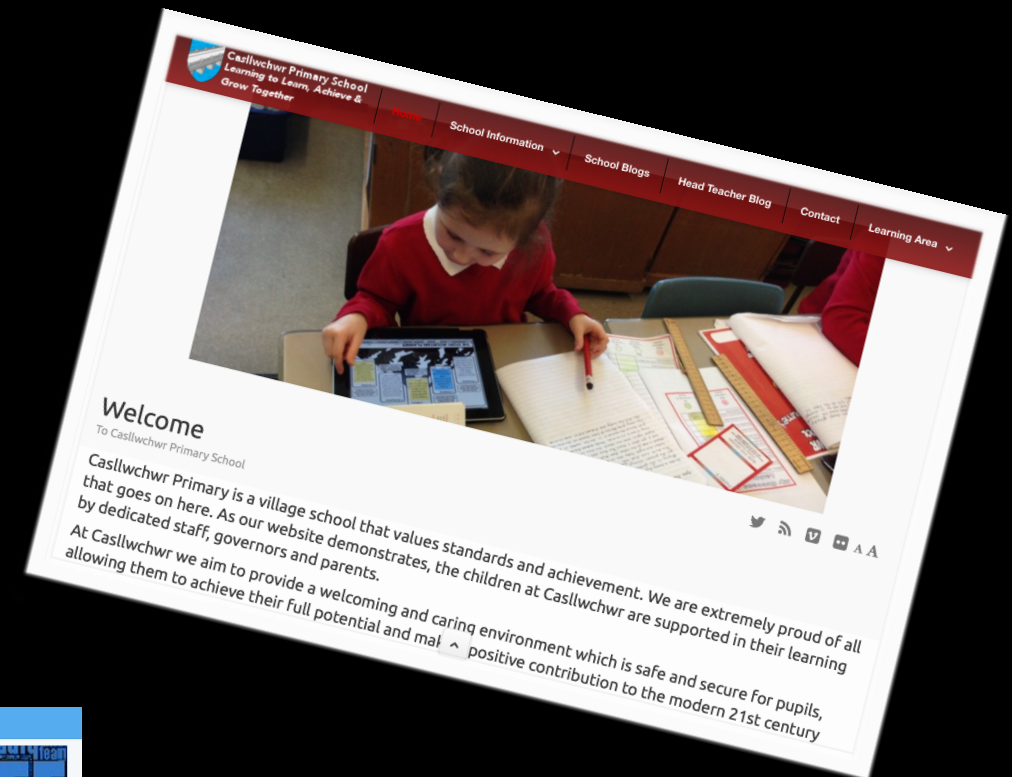

## iPad Apps for Learners with Dyslexia/ Reading and Writing Difficulties

# COMMUNITY ENGAGEMENT

# GOOGLE DRIVE

## 38 IDEAS for USING Google DRIVE IN THE CLASSROOM

### DOCS

- ① Collaborate and share lesson/curriculum plans
- ② Track instructional interventions
- ③ Create a simple webpage with Docs publishing
- ④ Share and collect assignments without printing
- ⑤ Provide instant feedback to students
- ⑥ Access documents in class or at home
- ⑦ Consolidate notes for department or faculty meetings
- ⑧ Improve writing skills through peer editing and feedback
- ⑨ Work on reports, research or papers together with peers in different classes, schools or countries
- ⑩ Keep a continuous, running log for assignments such as journal entries or writing samples

### SHEETS

- ⑪ Create a seating chart
- ⑫ Record grades with an organized grade book
- ⑬ Track attendance, missing assignment and behavior reports
- ⑭ Store a database of contact information for students and parents
- ⑮ Use a word cloud gadget to visualize written responses
- ⑯ Use an Apps Script to automatically email feedback to students
- ⑰ Collect data from across the web for research
- ⑱ Create interactive flashcards with a spreadsheet gadget
- ⑲ Format a weekly class schedule

### FORMS

- ⑳ Collect mailing addresses
- ㉑ Build quizzes
- ㉒ Student group welcome forms
- ㉓ Club event requests
- ㉔ Structured peer editing and feedback
- ㉕ Assignment checklist and submissions
- ㉖ Applications for positions in clubs, groups, student government, etc.

### SLIDES

- ㉗ Share presentations with your students and coworkers
- ㉘ Upload and convert existing presentations to Google Drive format
- ㉙ Download your presentations as .pdf, .pptx, or .txt files
- ㉚ Insert images and videos, and format your slides
- ㉛ Draw organizational charts, flowcharts, design diagrams and much more within a presentation
- ㉜ Publish and embed your presentations in a website, allowing access to a wide audience
- ㉝ Add slide transitions, animations and themes to create show-stopping presentations
- ㉞ See exactly what others are working on with colorful presence markers
- ㉟ Edit a presentation with other people simultaneously from different locations
- ㊱ Use revision history to see who made changes or to revert to earlier versions
- ㊲ Say hello, start a conversation or share new ideas using built-in chat
- ㊳ Use the comments feature to provide asynchronous feedback on slides

# E LEARNING MANAGER

INSPIRING TOMORROW'S LEADERS TODAY

## E Learning Manager - Role and Responsibilities

Staff Development
• Supporting with new apps
• Modelling how new apps support different areas of the curriculum
• Mentoring colleagues
• Training and supporting departments within the school
Increasing links with the community
• Developing the school website/blogs
• Developing the school website/blogs
• Social media to build relationships with the local and wider community
• Developing homework liaison via technology
• Training and supporting parents
e-safety
• Living and breathing the school's e-safety policy daily
• Working with digital leaders to ensure the messages of Internet safety are integrated and reinforced through the school
• Creating a permission letter for parents for pupils to appear in photos, videos, social media and blogs
• Collating information from parental permission and creating a database for all staff to refer to

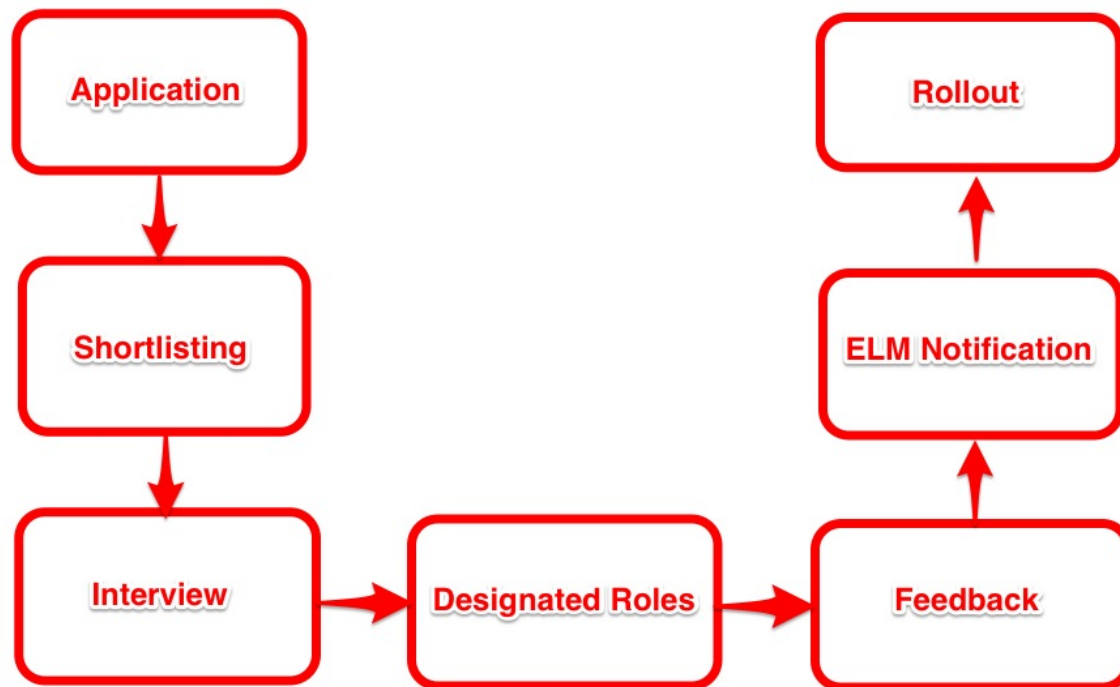

Management of Resources
• Control over app purchases
• Spreadsheet created for purchases
• Ensuring equipment is booked out, returned with created booking sheet (online booking sheet) • Liaising directly with technical support / external company if applicable
• Monitoring how often the equipment is used through the school
• Responsibility of managing media club
• Development of digital leaders and wizards

Monitoring Learning
• Monitoring of e portfolios and impact on learning. How do we know that what they are producing shows impact on learning?
• Collating evidence to illustrate learning and embedding on the website for the community to see its importance
• Creation of focus app sheets for termly planning to support each teacher's planning
Environment
• Ensuring the school environment shows digitalised learning: QR Codes, Aurasmas, Layar etc...

# POSITIVE PUBLICITY

## Increasing the use of IT in the classroom cannot start young enough

**T**HERE is an industrial revolution going on in classrooms across Wales that many parents will be blissfully unaware of. But as technology evolves and the way in which our children are taught changes apace, nobody – least not families – can be left behind.

Education Minister Leighton Andrews is a known advocate of technology in schools and his red hot Twitter account makes him one of the most accessible politicians in the Senedd. But he is by no means a trendsetter and Mr Andrews would be first to admit the Welsh Government is following the lead of such innovative and forward-thinking head teachers as Swansea's Simon Pridham.

Mr Pridham is right – times are changing and Wales can't afford to stand still. Business leaders bemoan a lack of key skills but in the 21st century a good knowledge of computers and technology is essential to a buoyant economy. The classroom environment is evolving so quickly that even this summer's school leavers will be surprised by some of the developments lower down the chain.

At Casllwchr Primary, every Key Stage 2 pupil has their own iPad and youngsters are encouraged to interact with each other and their teachers using e-mail.

Pupils use various apps to develop their work and by utilising pictures and sounds in a way they couldn't previously, teachers can find new ways of engaging learners.

Children can compare each other's work through their iPads and while new equipment "enhances, not replaces" old-style teaching methods, classrooms are very different places now from those we grew up in.

Hwb represents central government's response to a developing technological challenge. A new "virtual learning environment", it will be made available to all pupils aged three to 19 in Wales as part of a concerted drive to increase the use of technology in the classroom.

Providing a forum for debate and discussion, Hwb will be rolled out nationally over two years and help enable pupils and teachers to share best practice at the touch of a button. Made up of an integrated collection of online tools and services, it will eventually support learning and teaching for all school-aged pupils in Wales. Hwb was one of several recommendations made by the Digital Classroom Teaching Task and Finish Group, which reported to Mr Andrews in 2012.

Commissioned by the Welsh Government, the report supported the use of social networking sites such as Facebook and Twitter in the classroom.

There is no escaping that technology is the future and support from the worlds of business and education for events like Digital 2013 demonstrate a hunger to engage. For once, it may even be up to children to ensure parents are not left out in the cold.

## Wales should 'trail blaze' technology teaching in schools

**TEACHERS** were yesterday urged to move with the times and embrace technology as a digital revolution sweeps across Welsh classrooms. Emma Mulvaney, one of Britain's leading digital communication developers, warned that "Four Eight is too late" and age should be no barrier to learning online.

She said Wales was in a "perfect position to be agile" and by re-sponding to the needs of 21st century industry, it could "very quickly trail blaze" advances in technology around the world.

Addressing a major conference in Newport, Ms Mulvaney said children should be given the freedom to explore ICT (information and communication technology) at home before sharing their discoveries with teachers.

Ms Mulvaney, chief executive of Rewired State, the UK's largest independent developer network, said: "We risk failing generations by neglecting to teach basic skills to keep up with technology."

"Rather than simply consuming code-driven technology, there's no reason why our children can't go on to be its future producers."

Simon Pridham, executive headteacher of Casllwchr Primary School, spoke of the pioneering work going on with partners in and around Swansea.

He said teachers "have to adapt to change" and ensuring pedagogy, the curriculum and technology go hand in hand together would be key to success.

Casllwchr was the first school in Wales to give every Key Stage 2 pupil their own iPad to use for the duration of their studies and results at the school have risen significantly as a

**'YEAR EIGHT IS TOO LATE' IN THE DIGITAL REVOLUTION**

result. Every pupil is given a personal email address and while access to external parties is prohibited, they are encouraged to interact with each other and their teachers.

Pupils use various apps to develop their work and, by utilising pictures and sounds in a way they couldn't previously, teachers can find new ways of engaging learners.

Mr Pridham said: "What we find in schools is when you do this [embrace technology], pupils will know more than their teachers. That's just the way it is. Faced with that, you've got two choices: you either carry on doing what you're doing and forget that or you sit down with them and go on their educational journey with them."

Mr Pridham said there is "no place anymore" for the more traditional teacher who does not value the use of technology in the classroom – and teachers in Swansea are given "21st century development" training.

He said up-skilling school staff was key and teachers "can't stand still" as new technologies evolve and are introduced into the mainstream.

"Teachers are doing things now that three years ago they couldn't do and pupils are showing us new ways of learning," he said.

"It is disruptive but it has to be disruptive to make a difference. We

have to integrate technology into the educational journey."

Sarah Beece, acting headteacher at Casllwchr, said the days of ineffective white boards had gone and teaching methods were constantly evolving.

She likened iPad and their apps to a modern day "digital pencil case" and spoke of the creative licence children are given to prepare their work using technology.

"No longer do teachers stand at the front of the class in front of you. There isn't a front to our classroom – we can be everywhere," she said.

It comes as the Welsh Government prepares to roll out Hwb, a digital learning platform that will be made available to all pupils aged three to 19 in Wales.

Providing a forum for debate and discussion, Hwb will enable pupils and teachers to share best practice at the touch of a button.

Mr Pridham, a member of the Welsh Government's "practitioner's panel", said Education Minister Leighton Andrews "gave 100% the need to embrace technology in the classroom."

Deputy Minister for Skills and Technology Jeff Cuthbert said the ICT industry was "very important" to the Welsh economy and predicted it could generate a further £1.8bn over the next five years.

Digital 2013, a two-day conference designed to inspire businesses and educators in Wales to take on new technological challenges, concludes today with a keynote address from businessman Sir Terry Matthews.
