

Moses Blockbusters

Moses Blockbusters

Split the class into two teams. You can change the names of the teams in the digital resource by clicking on one of the hexagons and typing over Player 1 and Player 2.

Have the teams take it in turns to choose a hexagon to turn over and answer the question. If they get the answer correct then you should click the 'correct' button for their team. The hexagon will change colour and be out of play.

If they get it incorrect then click on the 'incorrect' button and the question will close down and still be in play.

The winning team is the team to turn a row of hexagons from left to right into the colour of their team.

The answers to all of the possible questions are below, but please note that the game will randomise the questions used each time it is played.

To begin a new game, simply press the reset button.
